Journal of Microscopy

Patron: HER MAJESTY THE QUEEN

Officers and Council 1982–83

President: A. W. ROBARDS

Vice-Presidents: J. R. GARRETT
H. PILLER

Executive Hon. Secretary: GILLIAN BULLOCK

Hon. Treasurer: B. C. COWEN

Hon. Secretary (Education): D. J. JOHNSON

Ordinary Members of Council:

M. G. DOBB
P. ECHLIN
D. A. HEMSLEY
S. J. HOLT
A. HOWIE
D. H. JACK
T. JOHNSON
HELEN LAIRD
B. D. LAKE
J. V. P. LONG
G. W. LORIMER
J. S. PLOEM

Hon. Joint Editors:

P. ECHLIN
C. V. HOWARD
D. C. JOY
G. W. LORIMER
A. J. SAUBERMANN

Administrator: P. G. FLEMING

Contents of Vol. 131

Part 1

A. W. McDowall, J.-J. Chang, R. Freeman, J. Lepault, C. A. Walter and J. Dubochet. Electron microscopy of frozen hydrated sections of vitreous ice and vitrified biological samples 1
W. B. Bald. Optimizing the cooling block for the quick freeze method 11
F. J. Hemming, P. Mesguich, G. Morel and P. M. Dubois. Cryoultramicrotomy versus plastic embedding: comparative immunocytochemistry of rat anterior pituitary cells 25
Helge Dalen, Paul Scheie, Reidar Myklebust and Thorvald Sætersdal. An ultrastructural study of cryofractured myocardial cells with special attention to the relationship between mitochondria and sarcoplasmic reticulum 35
W. M. Stobbs. TEM/STEM requirements: multipurpose or specialized instruments? 47
Y. S. Hascicek, S. Nourbakhsh and M. J. Goringe. On the preparation of specimens from multifilamentary Nb_3Sn superconducting wires for transmission electron microscopy 55
J. L. Hutchinson and L. A. Bursill. Fresnel fringe contrast of faceted voids within gem-quality diamond 63
K.-H. Herrmann. Instrumental requirements for high resolution imaging 67
J. G. Hanstede and P. O. Gerrits. The effects of embedding in water-soluble plastics on the final dimensions of liver sections 79
Haim Gamliel, Dorit Gurfel, Rachel Leizerowitz and Aaron Polliack. Air-drying of human leucocytes for scanning electron microscopy using the GTGO procedure 87
Andre F. Le Roy and Nicole Roinel. Radiation damage to lyophilized mineral solutions during electron probe analysis: quantitative study of chlorine loss as a function of beam current-density and sample mass-thickness 97
P. F. Elbers. Quantitative determination of elements by energy dispersive X-ray microanalysis and atomic absorption spectrometry in egg cells of *Lymnaea stagnalis* 107
Takuo Tsuji. Visualization of skin appendages by scanning electron microscopy 115
David C. Cottell. A method for the detection of amyloid in human tissue embedded in epon using a combination of polarizing light microscopy and electron microscopy 119

Short Technical Note

Harvey J. Marchant and David P. Thomas. Polylysine as an adhesive for the attachment of nanoplankton to substrates for electron microscopy 127

Rapid Publications

K. G. Kupke, J. P. Pickett, P. Ingram, D. P. Griffis, R. W. Linton and J. D. Shelburne. Correlative light, electron, and ion microscopy on a single histologic section RP1
H. J. G. Gundersen, B. S. Andersen and H. Fløe. Estimation of section thickness unbiased by cutting-deformation RP3

Part 2

The Barer Festschrift–II

ODILE MATHIEU, LUIS-M. CRUZ-ORIVE, HANS HOPPELER and EWALD R. WEIBEL. Estimating length density and quantifying aniostropy in skeletal muscle capillaries 131

MADHU GUPTA, T. M. MAYHEW, K. S. BEDI, A. K. SHARMA and F. H. WHITE. Inter-animal variation and its influence on the overall precision of morphometric estimates based on nested sampling designs 147

E. J. CLEGG. Morphometric studies of the spleen of the hypoxic mouse 155

S. JOSEPH. Refractometry of fungi 163

RICHARD W. HOROBIN. Staining plastic sections: a review of problems, explanations and possible solutions 173

G. H. COPE. Exocrine glands and protein secretion: a stereological viewpoint 187

S. BRADBURY. Commercial image analysers and the characterization of microscopical images 203

IAN CARR. Experimental lymphatic metastasis 211

HERBERT K. HAGLER, LINDA E. LOPEZ, JESSE S. FLORES, REBECCA J. LUNDSWICK and L. MAXIMILIAN BUJA. Standards for quantitative energy dispersive X-ray microanalysis of biological cryosections: validation and application to studies of myocardium 221

STEFFEN JUNKER. A high-resolution staining method for examination of mammalian cell surfaces in the light microscope 235

P. A. W. ROGERS and B. J. GANNON. The microvascular cast as a three-dimensional tissue skeleton: visualization of rapid morphological changes in tissues of the rat uterus 241

D. F. BLAKE, A. M. ISAACS and R. H. KUSHLER. A statistical method for the analysis of quantitative thin-film X-ray microanalytical data 249

Book Reviews 257

Part 3

Stereology 82

Introduction ii

R. T. DeHoff. Quantitative serial sectioning analysis: preview 259

L. M. Cruz-Orive. Distribution-free estimation of sphere size distributions from slabs showing overprojection and truncation, with a review of previous methods 265

H. J. G. Gundersen and E. B. Jensen. Particle sizes and their distributions estimated from line- and point-sampled intercepts. Including graphical unfolding 291

K. R. Clarke and M. N. Moore. Unbiased linear property estimation for spheres, from sections exhibiting overprojection and truncation 311

A. Baddeley and P. Averback. Stereology of tubular structures 323

Martin Sadler and Martin Berry. Morphometric study of the development of Purkinje cell dendritic trees in the mouse using vertex analysis 341

Didima M. G. De Groot and Egbertus P. B. Bierman. The complex-shaped 'perforated' synapse, a problem in quantitative stereology of the brain 355

James G. Walmsley. Vascular smooth muscle orientation in straight portions of human cerebral arteries 361

James G. Walmsley. Vascular smooth muscle orientation in curved branches and bifurcations of human cerebral arteries 377

Rapid Publication

Oliver C. Wells. Fundamental theorem for type-1 magnetic contrast in the scanning electron microscope (SEM) RP5
